

ABSTRACT

A table saw including a base, a main table supported by the base, first
5 and second rails attached to the table, a sliding table fixedly attached to the rails
and sliding along the longitudinal axis of the rails and a cross-cut table slidably
movable in a direction perpendicular to the longitudinal axis of the rails. The
cross-cut table may be adjusted to ensure movement parallel to a blade
protruding from the main table. An improved miter gauge assembly is also
10 disclosed. An improved fence assembly is further disclosed herein. In addition,
a table saw having an improved panel and leg construction is disclosed herein.
